Sprint Plan Week 2

Goal:

- The goal for this sprint is for a user to have the ability to add information about themselves and their favorite courts, as well as view information that others have shared.

Task List:

- As a pickleball player, I want to upload information on my favorite courts
 - Create tables/clusters in MongoDB for courts information (2 hours/ 1 point)
 - Create post method in server with relevant information (2 hours/ 3 points)
 - Create Interface to upload courts (2 hours/ 3 points)
 - Handle data from user side form and create request (2 hours/ 3 points)
- As a pickleball player, I want to be able to leave reviews on courts
 - Create interface for reviews (2 hour/ 2 points)
 - Create post method in server for ratings (2 hour / 1 point)
 - Create tables/clusters in MongoDB for reviews (2 hour/ 1 point)
- As a User I want to login and have personal information displayed.
 - Handling and serving user bio and friends upon login (3 hours/3 points)
 - caching user data and using cookies for login and logout. (4 hours/ 5 points)
 - Handling and serving user images stored on the server (3 hours/ 8 points)

Team Role:

- Jonathan, Product Owner
- Nick, Developer
- Caleb, Developer
- Mathew, Developer
- Royce, Scrum Master
