Sprint Report Week 1

Actions to Start Doing:
- We would like to organize our git branches better because we had conflict management issues. During this sprint, we didn't really use our own branches for the different features we were working on.
- We would like to keep the README of the project up to date. We did a bad job documenting what we have done and how the application works.

Actions to Stop Doing:
- We would like to stop getting off-topic during our meetings. Our daily stand-up meetings would sometimes last longer than 15 minutes because we would start diving into our problems or details of how features should be implemented.

Actions to Keep Doing:
- We want to keep meeting frequently in person and over Discord. This week we managed to complete 3 times in person and on the other days we met over Discord VC for our stand-up meetings.

Work Completed:
- As a pickleball player, I want information on nearby courts.
- As a new player, I would like a personalized app experience.

Work completion rate:
- 2 user stories completed
- 32 ideal working hours completed
- 7-day sprint
