Sprint Plan Week 3

Goal:

- The goal of this sprint is to make the app more sociable. This will include providing users with the ability to message each other, as well as posting on a community board / home page.

User Stories & Task List:

- As a pickleball player, I want access to recent or ongoing events in my community.
    - Create UI for home page (5)
    - Create server-side routes for home page: new posts & req's (3)
    - Create tables in mongoDB for the aforementioned new posts (3)
    - Set up long polling for home page (3)
- As a pickleball player, I want to be able to message people I meet.
    - Create UI for messages (3)
    - Sockets for messages (5)
    - Create interface with message history (3)
    - Set up server-side routes for message history (3)

Team Role:

- Jonathan, Product Owner & developer
- Nick, developer
- Caleb, Scrum Master & developer
- Matthew, Scrum Master & developer
- Royce, developer
